JHU Generative AI Resources

2026-11-12

The University provides access to a range of cutting-edge AI tools and related services. You are encouraged to use one of the currently approved tools listed below whenever possible. Please note that some tools are available only to WSE faculty, staff, and students and are therefore not included in this document.

Contact / support

- HopGPT@jh.edu (IT@JH / HopGPT support)
- wsehelp@jhu.edu (ChatGPT EDU)
- Claude licenses: request through the Johns Hopkins AI Management Portal (on campus or Johns Hopkins VPN required). Support: https://it.johnshopkins.edu/ai/amp-support/
- Guidelines for Responsible Use of AI: https://it.johnshopkins.edu/ai/guidelines-for-responsible-use-of-ai/

Key notes

Topic	Summary
Primary recommendation	Use HopGPT first for most users
Advanced institutional option	ChatGPT EDU for users needing advanced features
Claude (direct)	Johns Hopkins IT offers Claude Standard ($22/month) and Premium ($55/month) licenses via an academic enterprise license, on a recharge basis. Includes Claude Chat and Claude Code, with web search, chat history, and profile settings. Fiscal-year commitment required.
Claude + Microsoft data	Per WSE IT, Enterprise Claude is provisioned with read-only access to JH Microsoft infrastructure, so it can be used with email, calendar, and SharePoint information in the JH Microsoft tenant. Not available for non-Enterprise Claude accounts.
Productivity AI for Microsoft apps	Microsoft Copilot for Microsoft 365: PHI / PII / JH proprietary information may be used (must still follow JHU policy and app-specific restrictions)
Anthropic status	Available in HopGPT, in Copilot for Microsoft 365 (Opus only), and now directly through a JHU enterprise Claude license. Personal Anthropic Pro/Max plans are still not recommended: no institutional protections, and they cannot be added to a pcard.
Other frontier models	Johns Hopkins has been working on contracts and BAAs with OpenAI, Gemini, and Microsoft's Copilot CoWork.
Avoid	Personal ChatGPT accounts for JHU proprietary, FERPA, or PHI/PII data. A ChatGPT license bought on a pcard is a personal arrangement even when JH funds are used, and the user is personally liable for the consequences (per WSE IT). Use HopGPT or ChatGPT EDU instead.

JHU Generative AI resources

Name	Type	Cost / billing	Additional information
HopGPT	JHU institutional AI chat platform	Free to use	Includes multiple models such as OpenAI, Claude, and Llama; supports agents and team sharing; user settings include an Artifacts UI for enhanced code editing; available models change frequently, so check the HopGPT site; https://chat.ai.jh.edu. Resource page: https://hopgpt.it.jh.edu/. No web search or deep research due to HIPAA restrictions.
HopGPT API	API option for HopGPT	$1,500 upfront configuration/consultation fee + $50/month plus consumption pricing; billed to SAP	https://hopgpt.it.jh.edu/apiaccess/
ChatGPT EDU	Institutional ChatGPT enterprise-style service	$20-$200/month depending on usage tier; billed to SAP	Has legal/privacy protections that personal subscriptions do not; https://engineering.jhu.edu/cmts/chatgpt/. Features: Codex support, Deep Research, Projects, Custom GPTs, Memory, and Scheduling. WSE instance allows add-ins in Word, Excel, and PowerPoint and can be used with Google Sheets, but has no email or calendar connections. Configured for PII and student information but cannot be used for PHI or other healthcare information.
ChatGPT EDU API	API option for ChatGPT EDU	Based on usage; can set a default alert on a specific dollar amount; billed to SAP	Cost and models: https://openai.com/api/pricing/. OpenAI API requests: https://engineering.jhu.edu/cmts/jhu-openai-platform-api-request/
Microsoft Copilot for the Web	Public web-based AI assistant	Free to use	Accessible to all JHU users via browser; MyJH -> M365 Portal
Copilot for Microsoft 365	Productivity AI for MS apps	$215/user/year, billed to SAP	MyJH software store. PHI / PII / JH proprietary information may be used (must still follow JHU policy and app-specific restrictions). Includes Claude Opus, but not the other Claude models.
Claude Standard	JHU enterprise Claude license	$22/month, recharge; fiscal-year commitment; may upgrade to Premium mid-year	Claude Chat and Claude Code, including web search. Lower usage limits than Premium.
Claude Premium	JHU enterprise Claude license	$55/month, recharge; fiscal-year commitment; cannot downgrade mid-year	Same as Standard with higher usage limits. A Premium license is currently required to access the Fable 5 model.

Anthropic-related tools: current university status

Anthropic-related tool/service	Current JHU status	Notes
Anthropic Pro / Max personal plans	Not recommended for JHU research or teaching	No institutional protections and cannot be added to a pcard. Use the JHU enterprise Claude license instead.

Anthropic-related tool/service	Current JHU status	Notes
Claude Standard / Premium (JHU enterprise license)	Available now, recharge basis	Request via the AI Management Portal (on campus or VPN). Sign in with SSO; apps available for iOS, Windows, Android, and macOS. Subject to the Johns Hopkins Generative AI Terms of Use and Guidelines for Responsible Use of AI.
Claude Cowork / Claude Science	Not currently available	Cowork is listed as coming soon. Claude Science is not available.
Anthropic in HopGPT	Available as one of the chat models	Anthropic models in HopGPT are accessed through a partner agreement with AWS and use an AWS-specific version of the model.
Anthropic in Microsoft Copilot (Office 365)	Available as a recharge	Claude Opus is available, but not the other Claude models
Anthropic institutional contract status	Enterprise license now offered by JHU IT	The Claude page does not describe BAA or contract details beyond the data rules below; confirm with IT if needed.

Claude license details and data rules

- **Who can request:** Johns Hopkins faculty, staff, and students. Johns Hopkins Health System (JHHS) staff should instead use the JHM AI Access Request Center.
- **Commitment:** Purchase requires a commitment for the fiscal year. Charges begin the month the license is requested. Standard can be upgraded during the fiscal year; Premium cannot be downgraded.
- **Usage limits:** When the limit is reached, new messages are blocked until it resets on a rolling 5-hour cycle; existing conversations remain readable. Check usage under Account menu, Settings, Usage.
- **Regulated data:** Do not enter regulated data (including ePHI or other HIPAA data, PCI-DSS, CMMC/NIST SP 800-171, federal export-controlled data) or classified data. If unsure, treat it as restricted and leave it out. Exception: JHU-Medical Claude users may enter ePHI or HIPAA-regulated data.
- **Social Security numbers:** Do not enter.
- **FERPA data:** May be used, but limit student information to what is necessary for the task. You must also have permission or approval to use the data for that specific purpose.
