

JHU Generative AI Resources

2026-06-19

BSPH can reimburse or support the purchase of software only when it has already been approved through Johns Hopkins channels. The University is currently working to finalize the contracts and business associate agreements needed for frontier AI tools and related services, including Claude, OpenAI, Anthropic, and Microsoft Copilot CoWork, and the goal is to have OpenAI and Gemini in place by the end of the summer. In the meantime, faculty are encouraged to use one of the currently approved tools listed below whenever possible. If a new tool is needed later, it should first go through the appropriate university review and approval process before any purchase or reimbursement is considered.

In addition, you may see AI software provided by WSE. These tools are technically limited to WSE faculty, staff, and students, since the school has signature authority only for school-level use, not university-wide use. For that reason, they are not included in this documentation.

Contact/support:

- HopGPT@jh.edu (IT@JH / HopGPT support)
- wsehelp@jhu.edu (ChatGPT EDU)
- Guidelines for Responsible Use of AI: <https://it.johnshopkins.edu/ai/guidelines-for-responsible-use-of-ai/>

Key Notes:

Topic	Summary
Primary recommendation	Use HopGPT first for most users
Advanced institutional option	ChatGPT EDU for users needing advanced features
Productivity AI for Microsoft apps	PHI / PII / JH proprietary information may be used (must still follow JHU policy and app-specific restrictions) via Microsoft Copilot

Anthropic status	Available in some JHU-managed tools, but personal Anthropic Pro/Max is not currently the preferred university option because contract finalization is still pending
Other frontier models	Johns Hopkins is working on contracts and BAAs with Anthropic Claude, OpenAI, Gemini, and Microsoft's Copilot CoWork. Expectation is that by end of summer anticipate Claude and OpenAI will be signed
Avoid	Personal ChatGPT accounts for JHU proprietary or PHI/PII data

JHU Generative AI Resources:

Name	Type of resource	Cost / Billing	Additional information
HopGPT	JHU institutional AI chat platform	Free to use	Include multiple models such as OpenAI, Claude, and Llama; support agents and team sharing; https://chat.ai.jh.edu Resource page: https://hopgpt.it.jh.edu/
HopGPT API	API option for HopGPT	\$1,500 upfront configuration/consultation fee + \$50/month plus consumption pricing; billed to SAP	https://hopgpt.it.jh.edu/api-access/
ChatGPT EDU	Institutional ChatGPT enterprise-style service	\$20-\$200/month depending on usage tier; billed to SAP	Has legal/privacy protections that personal subscriptions do not; https://engineering.jhu.edu/cmts/chatgpt/
ChatGPT EDU API	API option for ChatGPT EDU	Based on usage; can set a default alert on a specific dollar amount; billed to SAP	Cost and models: https://openai.com/api/pricing/ OpenAI API Requests: https://engineering.jhu.edu/cmts/jhu-openai-platform-api-request/
Microsoft Copilot for the Web	Public web-based AI assistant	Free to use	Accessible to all JHU users via browser; MyJH -> M365 Portal
Copilot for Microsoft 365	Productivity AI for MS apps	\$215/user/year, billed to SAP	MyJH software store; PHI / PII / JH proprietary information may be used (must still follow JHU policy)

			and app-specific restrictions) Includes Claude models

Anthropic-related tools: current university status

Anthropic-related tool/service	Current JHU status	Notes:
Anthropic Pro / Max personal plans	Not recommended for JHU research or teaching	JHU IT is still working through contract team for enterprise plan. These plans do not have institutional protections and cannot be added to a pcard
Anthropic in HopGPT	Available as one of the chat models	HopGPT includes Claude from Anthropic among its available models
Anthropic institutional contract status	In progress / pending finalization	Likely finalization will be this summer
